

COAL REGIONS LEARNING ACADEMY

In the framework of the CRLA the College of Europe in Natolin designed and delivered 6 e-learning modules, the topics deriving from a matrix comprising the World Bank's:

 Pre-Closure

 Closure

 Regional Transition

3 key thematic areas:

- Governance
- People and Communities
- Land and Assets

The CRLA is available on GOXI, the World Bank's platform for dialogue and collaboration serving those actively working on governance issues in the extractive industries.

ABOUT THE PROJECT

The College of Europe in Natolin, in partnership with the World Bank, implemented the Coal Regions Learning Academy (CRLA). The aim of this project is to address capacity gaps that are impeding coal regions in Western Balkans and Ukraine from successfully designing and completing transition strategies and associated kick-start projects as part of the energy transitions in the beneficiary countries. The learning delivered through the Academy is reflecting a broad array of case studies, global good practices, guidance on analytical tools, and prevailing regulatory and administrative processes.

The CRLA contributes to wider initiative of the World Bank, the European Commission, the College of Europe in Natolin, the European Bank for Reconstruction and Development, the European Investment Bank, the Energy Community Secretariat and the Polish National Fund for Environment Protection and Water Management - the Initiative for Coal Regions in transition in Western Balkans and Ukraine. The latter managed by the European Commission (DG ENER).
